

'Curiosities on Luinig'

ACFA's survey with Luinig History Group started in 2016, led by Dugie Macinnes. Over four hundred features on, and still not quite finished, some intriguing sites have been discovered – a 'mickey mouse' cellular structure, a 'not the burnt mound', Dugie's 'chapel', promontory earthworks, two possible fortified homesteads and what could be a late prehistoric farm on the ridge between Luinig's two fine duns. Mary's talk presents key discoveries of the ACFA survey and of LHG's LiDAR survey conducted in 2020.
